

# GIS Peer Exchange

TTEC Building  
4099 Gourrier Avenue  
Baton Rouge, LA 70808

March 10, 2015

8:30 AM—3:30 PM

5 PDH's

In all areas of transportation data is collected and analyzed to make decisions that have huge impacts in the near and long term. While many tools are used to manage and analyze data and turn it into information one with great potential power is the geographic information system (GIS). GIS can help users visualize, question, analyze, and interpret data to understand relationships, patterns, and trends. This peer exchange is a first step in helping Louisiana's transportation data users understand the opportunities that GIS offers. We'll discuss some of the current uses of GIS and related technologies in our State and to introduce some new options to integrate and leverage data we have now and are collecting for future use.

## Topics for Discussion Include:

- ◆ Louisiana's GIS Capabilities
- ◆ The Use of LADOTD Enterprise GIS
- ◆ Legal and Data Governance Issues
- ◆ GIS in Traffic, Safety and Planning
- ◆ Local agency Use
- ◆ Options for moving Forward

**Free of charge. Pre-registration requested. E-mail Rudynah Capone at the Louisiana Center for Transportation Safety with registration information. For questions, contact Rudynah at 225-767-9718 or [Rudynah.Capone@LA.GOV](mailto:Rudynah.Capone@LA.GOV).**
